

Take Aways

- Remember your family...make sure they're safe & they know your status as well
- There will be a lot of information...and misinformation...take action based on the facts
- First things first...start with what's most important
- Be prepared Part 1: Make sure you keep things up to date...before they are needed
- Be prepared Part 2: Have the things you need ready for an emergency...both at the office and at home

Take Aways

- In real life, things take a lot longer to unfold compared to a drill
- We can't be emotional; we have a duty to respond, to do *our* job & be to strong.
- Be creative...
- Use any and all available resources to get information
- Lastly, in times of great challenge, people rise to the occasion; emergencies tend to bring out the very best in people...and the emergency responders are the best of the best in this regard. Make sure you thank them for what they do.
